Target version:	
Operating system: N/A	Relates to performance: No
Issue type: Bug	Easy: No
Milestone: Current	Relates to maintainability: No
Regression: Yes	Regression start: 4.0-7422
Relates to usability: No	Fixed in:
Description	
Game Name?	
Super Monkey Ball 2 - GM2E8P	
What's the problem? Describe what went wrong.	
In Monkey Target (fly around, collect bananas, land on targets minigame) you will randomly collect bananas that are nowhere near you. Just fly through the course and usually you'll collect 10 - 20 that are way away before you can land.	
What steps will reproduce the problem?	
Startup Super Monkey Ball 2 You do not need a savefile Go to minigames Launch Monkey Target, turn on 5 balls to increase chances of glitch grab Go down ramp, hit A to open wings at bottom of ramp. Fly somewhere lower left or lower right of the bananas in the top group to guarantee tons of glitch grabs. Flying normally while not collecting bananas will work too. Cry because you realize you've cheated the game and you have no integrity in life.	
Which versions of Dolphin did you test on? Does using an older version of Dolphin solve your issue? If yes, which versions of Dolphin used to work?	
4.0-7420 works 4.0-7422 broked	
What are your PC specifications? (CPU, GPU, Operating System, more)	
Core i5-3570K, GTX 1070, Windows 10	
Is there any other relevant information? (e.g. logs, screenshots, configuration files)	
RIP Super Monkey Ball Integrity 2002 - 2017

For a regression to go unnoticed for this long and with how sensitive super monkey ball games are, I don't agree with this being marked as urgent
