Milestone:	Relates to maintainability: No
Regression: No	Regression start:
Relates to usability: No	Fixed in:

Description

It would be nice to eventually use Dolphin for loading codes from a virtual SDHC card using Gecko OS.

Is the issue present in the latest development version? For future reference, please also write down the version number of the latest development version.

5.0-6033

What are your PC specifications? (CPU, GPU, Operating System, more)

Samsung Galaxy Note8 (SM-N950U)
Qualcomm Snapdragon 835
Octa-core (4x2.35 GHz Kryo & 4x1.9 GHz Kryo)
Adreno 540
Android 7.1.1
Baseband version N950USQS2BQK2
Kernel version 4.4.21
6GB RAM (LPDDR4)

Is there anything else that can help developers narrow down the issue? (e.g. logs, screenshots, configuration files, savefiles, savestates)

I finally got a Galaxy Note8! Time to throw Dolphin at it.

History

Dolphin already supports SDHC. Are you requesting something other than SDHC support, like a setting in the Android GUI for whether an SD/SDHC card should be inserted?

#2 - 12/15/2017 07:14 AM - ryanebola16

Yes, I meant SD card insertion should be a setting for Android. So SD/SDHC support works on Android but the setting to enable it isn't in the GUI?

#3 - 12/15/2017 07:22 AM - JosJuice

- Issue type changed from Bug to Feature request

- Assignee set to JosJuice

- Status changed from New to Accepted

- Subject changed from Android: Add SDHC support to Android: Add SD card setting to GUI

- *Operating system Android added*
- *Operating system deleted (N/A)*

Yes, it should be working already if you enable it in the INI.

#4 - 01/12/2018 08:18 PM - Helios

- *Easy changed from No to Yes*

#5 - 03/21/2018 05:50 PM - ryanebola16

Also, the SD card path should be settable in the UI.
