Description

Game Name?

Dolphin Emulator

What's the problem? Describe what went wrong.

In the translation files (Languages\po\), the "Language-Team" URL "<http://www.transifex.com/delroth/dolphin-emu/language/>" leads to a 404 error page.

The team URL should be updated to reference "<https://www.transifex.com/projects/p/dolphin-emu/>".

What steps will reproduce the problem?

1. Open 'Languages\po\es.po'
2. Scroll down and visit the url specified in "Language Team"

Is the issue present in the latest development version? For future reference, please also write down the version number of the latest development version.

5.0-9198

Is the issue present in the latest stable version?

Yes

History

#1 - 12/04/2018 08:06 PM - Stevoisiak

- Correction: The Spanish translation URL <http://www.transifex.com/delroth/dolphin-emu/> works. The URL in Languages\po\ar.po (<http://www.transifex.com/delroth/dolphin-emu/language/>) does not work.

#2 - 12/04/2018 09:44 PM - JosJuice

- Status changed from New to Working as intended

The URL is wrapped over two lines, so the full URL is <http://www.transifex.com/delroth/dolphin-emu/language/ar/>, and that URL leads to the intended page.
