Category:			
Target version:			
Operating system:	OS X	Relates to performance:	No
Issue type:	Bug	Easy:	No
Milestone:	Current	Relates to maintainability:	No
Regression:	No	Regression start:	
Relates to usability:	No	Fixed in:	
Description			
See attached screenshots.			
Backgrounds are missing from all tabbed menus, and almost all text is low-res. Dark mode and accent color support are also missing, but these are much lower priority.			
I've heard there are many UI issues with Qt on Mojave that are fixed by updating to Qt 5.12 (but I'm not sure what Qt version Dolphin is using currently).			

History

#1 - 01/11/2019 02:05 AM - Maylmlae

- Milestone set to Current
- Assignee set to spycrab0
- Status changed from New to Accepted
- Operating system OS X added
- Operating system deleted (N/A)

I've seen this a fair bit but didn't bother to make a report. So this doesn't occur in High Sierra, so this is very likely a Qt bug, not a Dolphin bug.

#2 - 01/25/2019 02:50 AM - 8times9

See these pages:

- <http://blog.qt.io/blog/2018/11/08/qt-macos-10-14-mojave/>
- <https://bugreports.qt.io/browse/QTBUG-68824?attachmentOrder=desc>
- <https://bugreports.qt.io/browse/QTBUG-68891>

Qt 5.12 fixes these issues.

#3 - 02/06/2019 08:48 AM - spycrab0

- Status changed from Accepted to Fix pending

The macOS buildbot uses Qt 5.12 now but it's down right now.

Once it's up again that build should be used for "Fixed in".

#4 - 02/06/2019 11:00 PM - 8times9

That's great. Do you have any idea when the macOS buildbot will be back online?

#5 - 02/07/2019 10:09 PM - 8times9

Actually, it looks like the buildbot has been using Qt 5.12 for Mac since 5.0-9429 (but it's been down since 5.0-9431). So this was fixed in 5.0-9429.
