Description

What's the problem? Describe what went wrong.

WHen i pause a game, and let 5 min iddle, the wiimote disconnect. There's any way to reconnect again. Forcing search wiimotes doesn't solve the problem. The only way is save state, return to main menu and start again.

What steps will reproduce the problem?

Play a game, pause, and let 5 minutes iddle.

Is the issue present in the latest development version? For future reference, please also write down the version number of the latest development version.

yes . 5.0-12722

Is the issue present in the latest stable version?

yes

What are your PC specifications? (CPU, GPU, Operating System, more)

Samsung S10e exynos, Android 10.
