Description What steps will reproduce the problem? 1. Selecting House of the dead 3 (perfectly fine and graphical is great!) 2. Selecting House of the Dead 2 (error -- look below) 3. What is the expected output? What do you see instead? /dev/di executes unknown cmd 0x0000008c It only happen to x64 issue. I was told that 32 bit works fine so obviously it is a problem to x64 issue. What version of the product are you using? On what operating system? Using dolphin version 1590 and have the same error as far as I know since rev 1500. I have Windows XP Professional x64. Please provide any additional information below. I noticed a fps freezed after an error and black screen after an error as well...GREAT JOB on House of the Dead 3 and graphical both are great!
