Target version:	
Operating system: N/A	Relates to performance: No
Issue type: Bug	Easy: No
Milestone:	Relates to maintainability: No
Regression: No	Regression start:
Relates to usability: No	Fixed in:
Description	
1) Game Name and ID (as it appears in right click > properties: "GZ2P01", "RSBE01", etc): WFLE01 Fluidity \ Hydroventure	
2) What is the expected output? What do you see instead? I should be able to play the game, but the emu crash before I can get ingame and play	
3) Did the game ever work correctly (i.e. not have this problem) on an earlier version of dolphin? Please specify the exact revision when the problem began. Yes it worked, I've to test some revs...	
4) What steps will reproduce the problem? 1. Start the game 2. press 2 to "open the book" 3. press 2 to go in the selected world 4. Crash before it's possible to play, it seem that the crash occur precisely when the water should appear	
5) What version of dolphin are you using (32bit/64bit along with the version as it appears in the title bar, etc)? On what operating system, drivers, and hardware? Be sure to list OS, graphics driver information, and video card model if you are having graphics problems, for example. I'm using 3.0-363 INTEL AVX +DCP x64, on windows 7 x64, nvidia gtx 570 last drivers, intel i5 2500k	
6) Please provide any additional information below. I tried, with jit, jitl, dx9, dx11, opengl, safe texture cache on max accuracy and max performance, with efb to ram and to texture.

[issue 5146](#) has been merged into this issue.

#4 - 01/26/2012 10:56 AM - giaga7

So ia it possible to fix?:P I noticed that other games (in particular wiiware games) have been broken... lost winds 1 & 2, and fluidity and now tv show king party 2...

#5 - 01/26/2012 03:53 PM - skidau

Yes, it is possible when I have some time to look into it.
