**Description**

**Game Name?**

Sexy Poker - WHPEGL

**What's the problem? Describe what went wrong.**

On the characters, there are little seams between where the animations should be on mouths and other body parts. It's similar to Fire Emblem, but, unlike those games no settings seem to fix it.

**What steps will reproduce the problem?**

Have a distinct lack of self-respect to be found in possession of this game.

**Which versions of Dolphin did you test on? Does using an older version of Dolphin solve your issue? If yes, which versions of Dolphin used to work?**

4.0.2, 4.0-9154

**What are your PC specifications? (CPU, GPU, Operating System, more)**

Core i5 3570K, GTX 760, Windows 10

**Is there any other relevant information? (e.g. logs, screenshots, configuration files)**

The screenshots from this game may not be suitable for children.

#### History

Users will be really disappointed to find that this game is buggy.

**#2 - 03/29/2016 11:07 PM - JMC4789**

Software Renderer has difficulty running this game, but in a fifolog if I pause on the right frame, I can see that the mouth is displayed correctly.

We should mark this Urgent.

fifolog. Works in SW renderer, albeit flickering.

Note: whoever fixes this makes me write about it in the progress report. Just putting that out there.

Other people have confirmed and even looked into this. I know, I'm surprised too.

Is this still broken

Likely yes. There are multiple issues around this, see [#6833](#) and [#10401](#).

I tested some fifologs (with a build from the past few days) and they still exhibit this issue. When I looked into it last year, it seemed like it was a texture issue where maybe our UVs were wrong.

Free shot to get into a progress report ya'll

I mean don't you want to be the one that fixed SEXY POKER in Dolphin? Is that not motivation enough?
